

User Flow

From DM to Confirmed Order | Main MVP Journey

OLUSOLA AYODEJI EZEKIEL

Flow Objective

The user flow covers the core journey from an agreed sale in WhatsApp or Instagram to a confirmed order that the seller can track. It deliberately starts after purchase intent. Product discovery, negotiation and social conversation remain outside the product.

Primary Flow

Step	User action / system state	Why it matters
1	Buyer says "I want it" in chat	Purchase intent already exists.
2	Seller opens dashboard	Seller starts a structured order.
3	Seller creates order	Adds product, quantity, amount and optional note.
4	System generates checkout link	One link replaces multiple follow-up questions.
5	Seller shares link in chat	WhatsApp/Instagram remains the communication channel.
6	Buyer opens order summary	Checks product, quantity and total before continuing.
7	Buyer enters fulfilment details	Name, phone, address, city/state and optional note.
8	Buyer selects payment option	Bank transfer or card in the prototype.
9	Buyer completes simulated payment	Prototype validates the flow without live payment integration.
10	Buyer sees confirmation	Order reference gives a clear end state.
11	Seller sees updated order	Order is marked paid/awaiting fulfilment.
12	Seller opens order details	Product, buyer, payment and delivery data are together.

Flow Diagram

Key Decision Points

- The seller does not create a catalogue or storefront before using the MVP.
- The buyer can review the order before entering personal information.
- Payment is simulated in the prototype; the flow is the focus of the assessment.
- The final seller view combines order, customer, payment and delivery information in one record.

Happy Path Success State

The flow is successful when the buyer reaches confirmation and the seller can see the same order as paid and ready for fulfilment, with the information required to complete delivery.

Out-of-Scope Flows

- Product discovery and search
- Seller-buyer negotiation
- Returns and disputes
- Live logistics booking
- Inventory deduction
- Refunds
- Loyalty and promotions
